Presentations:

Moderate Sedation & The Opioid Crisis: Are You Prepared for The Emergency You Hope Never Happens?

This course helps the sedation dentist and team to create a system for their office that can easily be implemented to help navigate through 13 of the most common medical/dental emergencies.

Emergency Drug Cart: How to Prepare a Custom Made Emergency Cart and Save Money

Most state dental boards will require dentists to have an emergency drug cart in the office. If you are permitted to perform procedures such as IV or oral sedation, you may be required to possess more drugs with advanced delivery methods such as the ones we will discuss in this course.

IV Sedation Medications: Tips, Tricks, Pros, and Cons.

Dive into the best IV practices and learn about the medications that can help you create a safer and more successful moderate sedation experience. Refresh the pharmacology that seems to overwhelm most dentists and make it user friendly to your daily practice.

A New World of Sedation Dentistry

Oral sedation vs. IV moderate sedation, which One is Best for your practice? In this discussion we will dive into the pros and cons of each method of sedation while delivering digestible pharmacology. Uncover some tips and tricks to better predict your sedation outcomes while creating the best experience for your patients and sedation team.

Moderate Sedation & The Opioid Crisis: Are You Prepared for The Emergency You Hope Never Happens?

You are the leader for all in-office emergencies with the responsibility of caring for your patients and dental team. All people walking through your door deserve to have a director who is prepared to triage and navigate the dental office emergencies if one should arise. This course will help you know your drugs, the established state dental board protocols, and when it is time to call for help. Your actions could save a life or be the cause of a potentially life-threatening emergency. Do not be fooled by some common misconceptions and pitfalls that many dentists fall into while running a sedation dental practice.

Learning Objectives:

- Define tips and tricks for building a team organized approached for dental emergencies
- Clarify the approved medications for California moderate sedation permit holders as well as most other states
- Identify the minimum standard of patient care for the moderately sedated patient
- Explore the downfalls and common mistakes of dentists performing sedation

Suggested Format: Full or Partial Day, Lecture, Workshop, Evening, Keynote,
Suggested Audience: All Dental Professionals, Oral Sedation Permit Dental Professionals, IV (Moderate) Sedation Dental Professionals. Dentists and Sedation Clinical Team

Emergency Drug Cart: How to Prepare a Custom Made Emergency Cart and Save Money

If you have ever ordered one of those pre-made emergency drug carts you know just how expensive and confusing they can be. Some of them come with drugs that don't have the right attachments for your sedation systems, some come with drugs you don't even know how to use, and the cost alone can be outrageous. So, what would happen to your confidence if you personally knew how each drug was ordered, used, and personally pre-prepared each drug for each specific emergency? This course will show you exactly what is expected to be in your emergency cart, how to order the drugs to reduce the overhead costs, and how to systematically organize the cart so you can be prepared for any emergency. This course can cut drug ordering costs by up to 50% and greatly boost the doctor's and team confidence for navigating any emergency should one arise.

Learning Objectives:

- Define a team organized approach for dental emergencies
- Clarify the state requirements for emergency drug carts
- Identify the methods of drug delivery
- Explore cost effective methods of ordering emergency drugs and other sedative equipment

Suggested Format: Full or Partial Day, Lecture, Workshop, Evening, Keynote,
Suggested Audience: All Dental Professionals, Oral Sedation Permit Dental Professionals, IV (Moderate) Sedation Dental Professionals. Dentists and Sedation Clinical Team

IV Sedation Medications: Tips, Tricks, Pros, and Cons

Anxious patients, anxious staff, and an anxious dentist can be an amalgamation for a disaster. Being a dentist with a moderate sedation permit carries a great deal of responsibility for staying up to date with the medications, pharmacology, and emergency protocols that are necessary while working with these complex patients. We will review the pharmacology and administration of moderate sedation medications and expand on additional medications and equipment that can help make your sedation and patient experiences more successful. Struggling with IV sticks and starts? Learn some tips and tricks that should help you quickly and effectively start IV's on even the more difficult patients.

Learning Objectives:

- Review the sedative drugs, dosages, and best practices to enhance the sedation practice and patient healing outcomes
- Clarify the reversal agents and the proper situations for use
- Demonstrate hands-on IV placement tips and tricks

Suggested Format: Full or Partial Day, Lecture, Workshop, Evening, Keynote,
Suggested Audience: All Dental Professionals, Oral Sedation Permit Dental Professionals, IV (Moderate) Sedation Dental Professionals. Dentists and Sedation Clinical Team

New Year, New Regulations; A New World of Sedation Dentistry:

There are many changes in the works for California dental sedation providers as the Senate Bill 501 took into effect on January 1, 2022. As the dental board of California updated the laws and regulations for sedation dentists let's dive into some of the new aspects of the bill that will affect our licenses and practices. If you are a California dental sedation permit holder, these changes will be affecting you and we all need to understand how to prepare for those changes over the next few years. Preparing your office for these upcoming changes and other emergencies that can arise during a routine sedation appointment will help keep you and your team out of trouble.

Learning Objectives:

- Define the Senate Bill 501
- Identify the changes from Conscious Sedation Permits to Moderate Sedation Permits
- Explore the downfalls and common mistakes of performing sedation
- Illustrate the characteristics of the levels of sedation
- Discover techniques for improving sedation outcomes

Suggested Format: Full or Partial Day, Lecture, Workshop, Evening, Keynote,
Suggested Audience: All Dental Professionals, Oral Sedation Permit Dental Professionals, IV (Moderate) Sedation Dental Professionals. Dentists and Sedation Clinical Team

Gina L. Salatino DMD, FAGD

Let's face it, most dental speakers really know how to sedate their audiences without using any drugs to do so. But what if you could listen to an actual rock star who knows how to liven' up the class with some entertainment while presenting?

Whether it's presented in front of an audience of 5 or 5,000 Dr. Salatino's goal is to connect with everyone in the room. Education, inspiration, and practicality are main focuses to help the everyday dentist and dental team get motivated. Bringing the subject matter back to the office on Monday to deliver optimum care to our patients not only strengthens practices, but also improves the overall reputation of dentistry.

As a professional musician, writer, and producer Gina has co-written and recorded multiple albums including two with the band Some Fear None and two solo albums under the persona Steryk. She toured and performed with many bands such as Papa Roach, Tool, Korn, Quensryche, Puddle of Mudd, Chevelle, Oleander, and many more. She is an endorsed guitarist and bassist with the companies PRS Guitars and Spector Basses. Her music, performances, and videos can be found on all music platforms including Apple Music, Spotify, Pandora, and YouTube.

A graduate from the University of Nevada, Las Vegas School of Dental Medicine, Gina has served the Rocklin California area as a general dentist since 2010. Gina was trained in moderate IV sedation while in dental school and for 6 years post graduate she trained roughly half of the nation's dental sedation providers in moderate IV sedation. Today she owns and maintains a full-time general dental practice, provides mobile moderate sedation services to dentists in the Northern California area, performs sedation evaluations for the Dental Board of California and operates a dental assisting program for teaching radiation safety. In 2015 she published a pocket drug guidebook to help fellow sedation providers with quick, easy, and helpful guidance while selecting or administering sedative drugs for sedation.

Gina is passionate about education and is currently devoted to completing her masters in the Academy of General Dentistry. In 2011 she was awarded her fellowship in DOCs sedation program and in 2015 her fellowship in the Academy of General Dentistry.

Testimonials

“Dr. Salatino– Thanks for a great lecture today. Second time I've seen you present you are really good at it.”

– Dr. Eric M.

It was so amazing to meet you today. I really appreciate you chatting with me... I always appreciate lecturers like you – thank you for being so real and so awesome.

– Dr. Sheena V.

Thank you so much for your help. First IV Sedation went really well. You are the best at heart... I do appreciate all your help and support.

– Dr. BokSoon G.

Dr. Salatino, Thank you for a great session yesterday.

– Dr. John L

Thank you for sharing your sedation info. I appreciate it and will tailor it to our sedation recordkeeping.

– Dr. Nicky H.
